4. (Amended) The image data processing method as claimed in claim 3, wherein the
image data to be processed is image data on a record medium recording the image data
acquired by the image data acquisition means, and

wherein the identification information is information with the image data recorded
on the record medium.

5. (Amended) The image data processing method as claimed in claim 3, wherein the
image data to be processed is image data transferred through communication means from
the image data acquisition means, and

BB
wherein the identification information is information with the image data
transferred through the communication means.

Sub C1
BB
9. (Amended) The image data print apparatus as claimed in claim 8, wherein the image
data to be processed, read by said image data read section is image data on a record
medium recording the image data acquired by the image data acquisition means, and
wherein the identification information is information with the image data on the
record medium.

10. (Amended) The image data print apparatus as claimed in claim 8, wherein the
image data to be processed, read by said image data read section is image data transferred
through communication means from the image data acquisition means, and
wherein the identification information is information with the image data
transferred through the communication means.

Sub C1
BB
14. (Amended) The record medium recording the image data processing program
as claimed in claim 13, wherein the image data to be processed is image data on a record
medium recording the image data acquired by the image data acquisition means, and
wherein the identification information is information with the image data recorded
on the record medium.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/449,772

Our Ref.: Q57011
Art Unit: 2622

B4
15. (Amended) The record medium recording the image data processing program
as claimed in claim 13, wherein the image data to be processed is image data transferred
through communication means from the image data acquisition means, and
wherein the identification information is information with the image data
transferred through the communication means.
